

Announcing Second International Conference with Exhibition

# @assessment tomorrow

21st Century Techniques and Technologies to Measure Skills and Knowledge

13<sup>th</sup> October 2005  
Davenport Hotel  
Dublin

Announcing a conference that examines the use of ICT and IT to measure skills, knowledge and understanding from the classroom to the workplace.

This conference is designed for all those involved in the selection, development, and implementation of assessment systems to manage and deliver skills, training and learning. It follows the successful model already established by the annual e-Assessment-Question Conference held in London, UK each year, and the equally successful FIRST International Assessment Tomorrow conference in Kuala Lumpur in February 2005.

Speakers from leading Irish and UK organisations, with local education and training experts, will consider how ICT can help in the design and delivery of qualifications, the role of computer based testing and assessment, e-Assessment developments and how e-Assessment can be used to support and enhance learning in the classroom and the workplace.

## Speakers Include:

Broadcast Learning  
BTL  
Calibrand  
CCEA  
Cojent  
ECDL  
Electric Paper  
Promissor  
Thomson Prometric  
Centre for Teaching and Learning, UCD

A small informal exhibition will be provided for delegates to see some of the latest developments in e-Assessment.

Announcing Second International Conference with Exhibition

# @assessment tomorrow

21st Century Techniques and Technologies to Measure Skills and Knowledge

## Why you should attend?

- To understand e-assessment developments and issues
- To examine solutions available
- To share experience and best practice
- To initiate future policy and planning
- To see how the data can be used
- To discuss how assessment supports learning

For those using, or considering using, information technology

- to measure the skills and knowledge of learners taking formal academic or professional qualifications,
- or to take advantage of the flexibility and effectiveness of the technology to record and assess learning,
- or to use for continuing professional development of staff, even using it to appraise employees and candidates,

this conference will enable you to see how e-Assessment, computer based assessment and testing, offers exciting and innovative approaches to the otherwise costly and inflexible assessment of the skills, knowledge and understanding of learners, students or employees.

## Who should attend?

Central & Regional Government, Education Agencies & Local Authorities  
Senior Managers from Training and Human Resource Departments  
Senior Managers in Schools, Colleges and Training Providers  
Education, Training and Qualification Policy Makers  
Awarding Bodies and Assessment Providers  
Trainers and e-Learning Publishers
